

Asylum

The entrypoint to the gaming metaverse

January 2022

Traction

- Pre-seed round
- Definition of concept and operation plan
- Supercolony partnership
- Reworking of concept
- Feedback from VCs
- VCs interested
- Partnership with 3 games that will launch first on Asylum
- Ignition

Problem

Blockchain gamedev studios

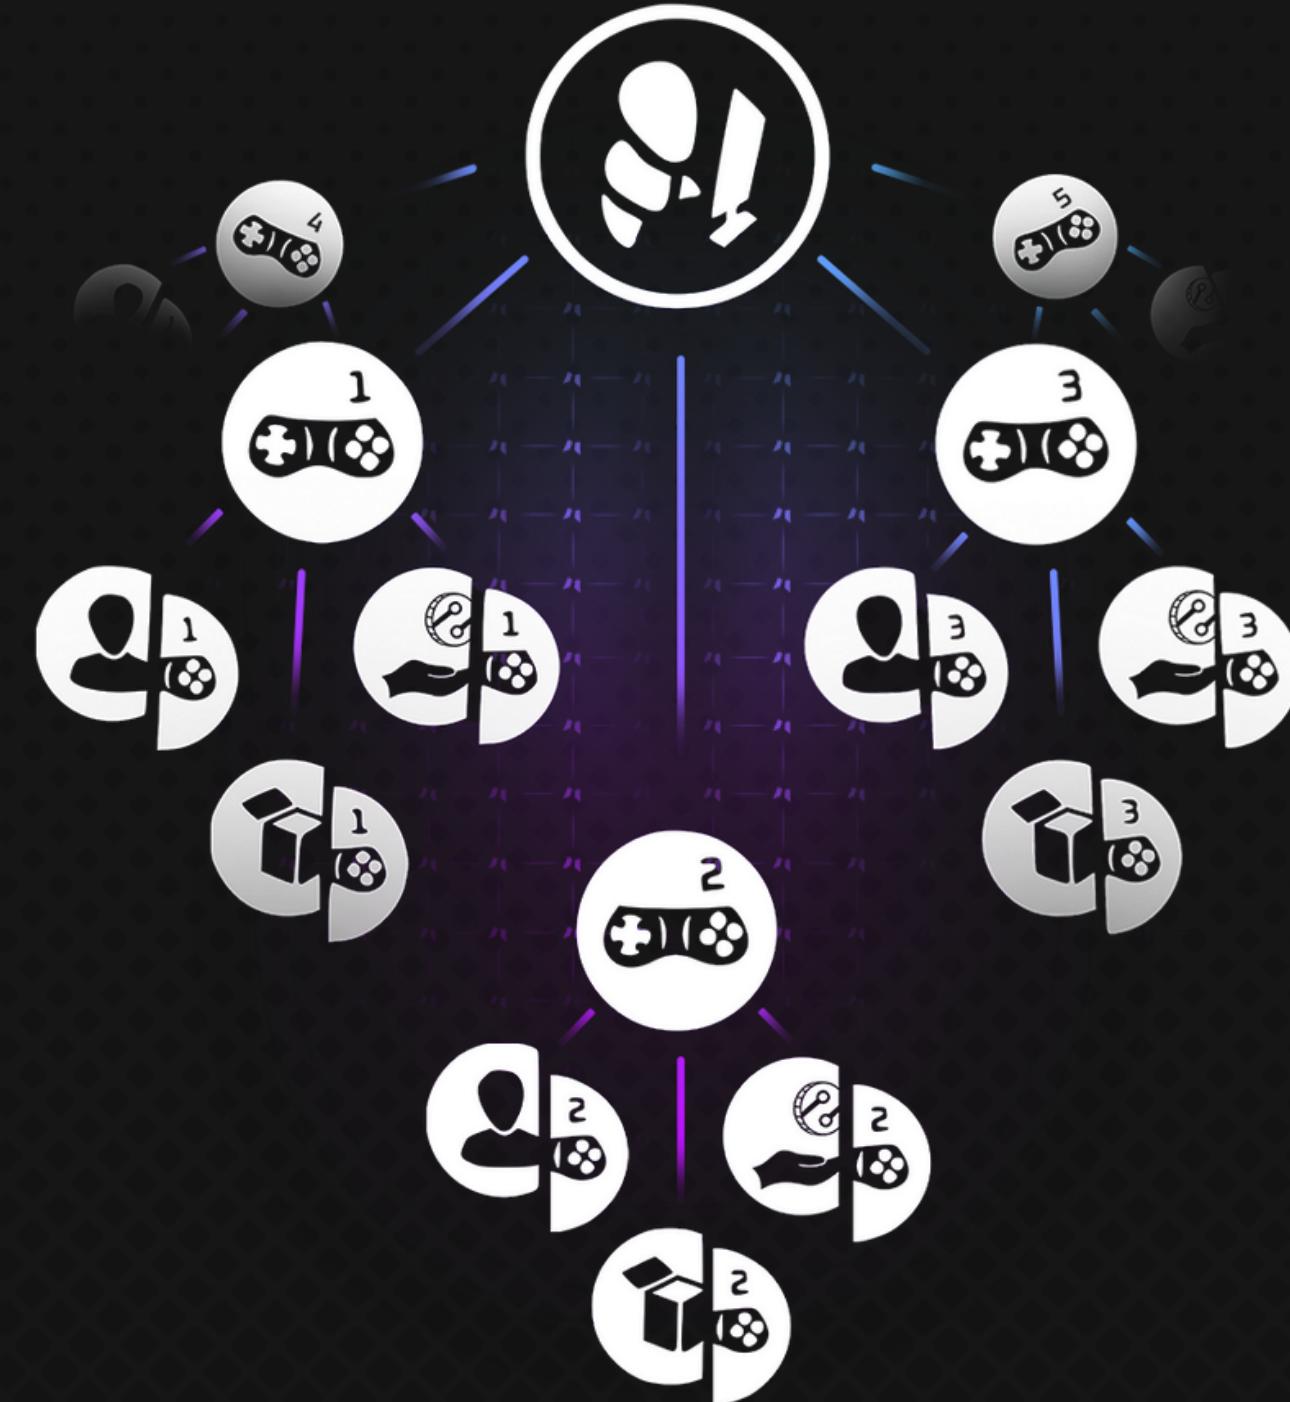

Spend a lot of money promoting their game and engaging audience

Developers

Spend a lot of time "reinventing the wheel" integrating blockchain to the game

Gamers

Have a lot of additional expenses acquiring a starter pack for every game they want to play

Solution

- Interoperability standard for game items**

Same items and avatars can be used in different games

- Blockchain agnostic solution to build and operate games**

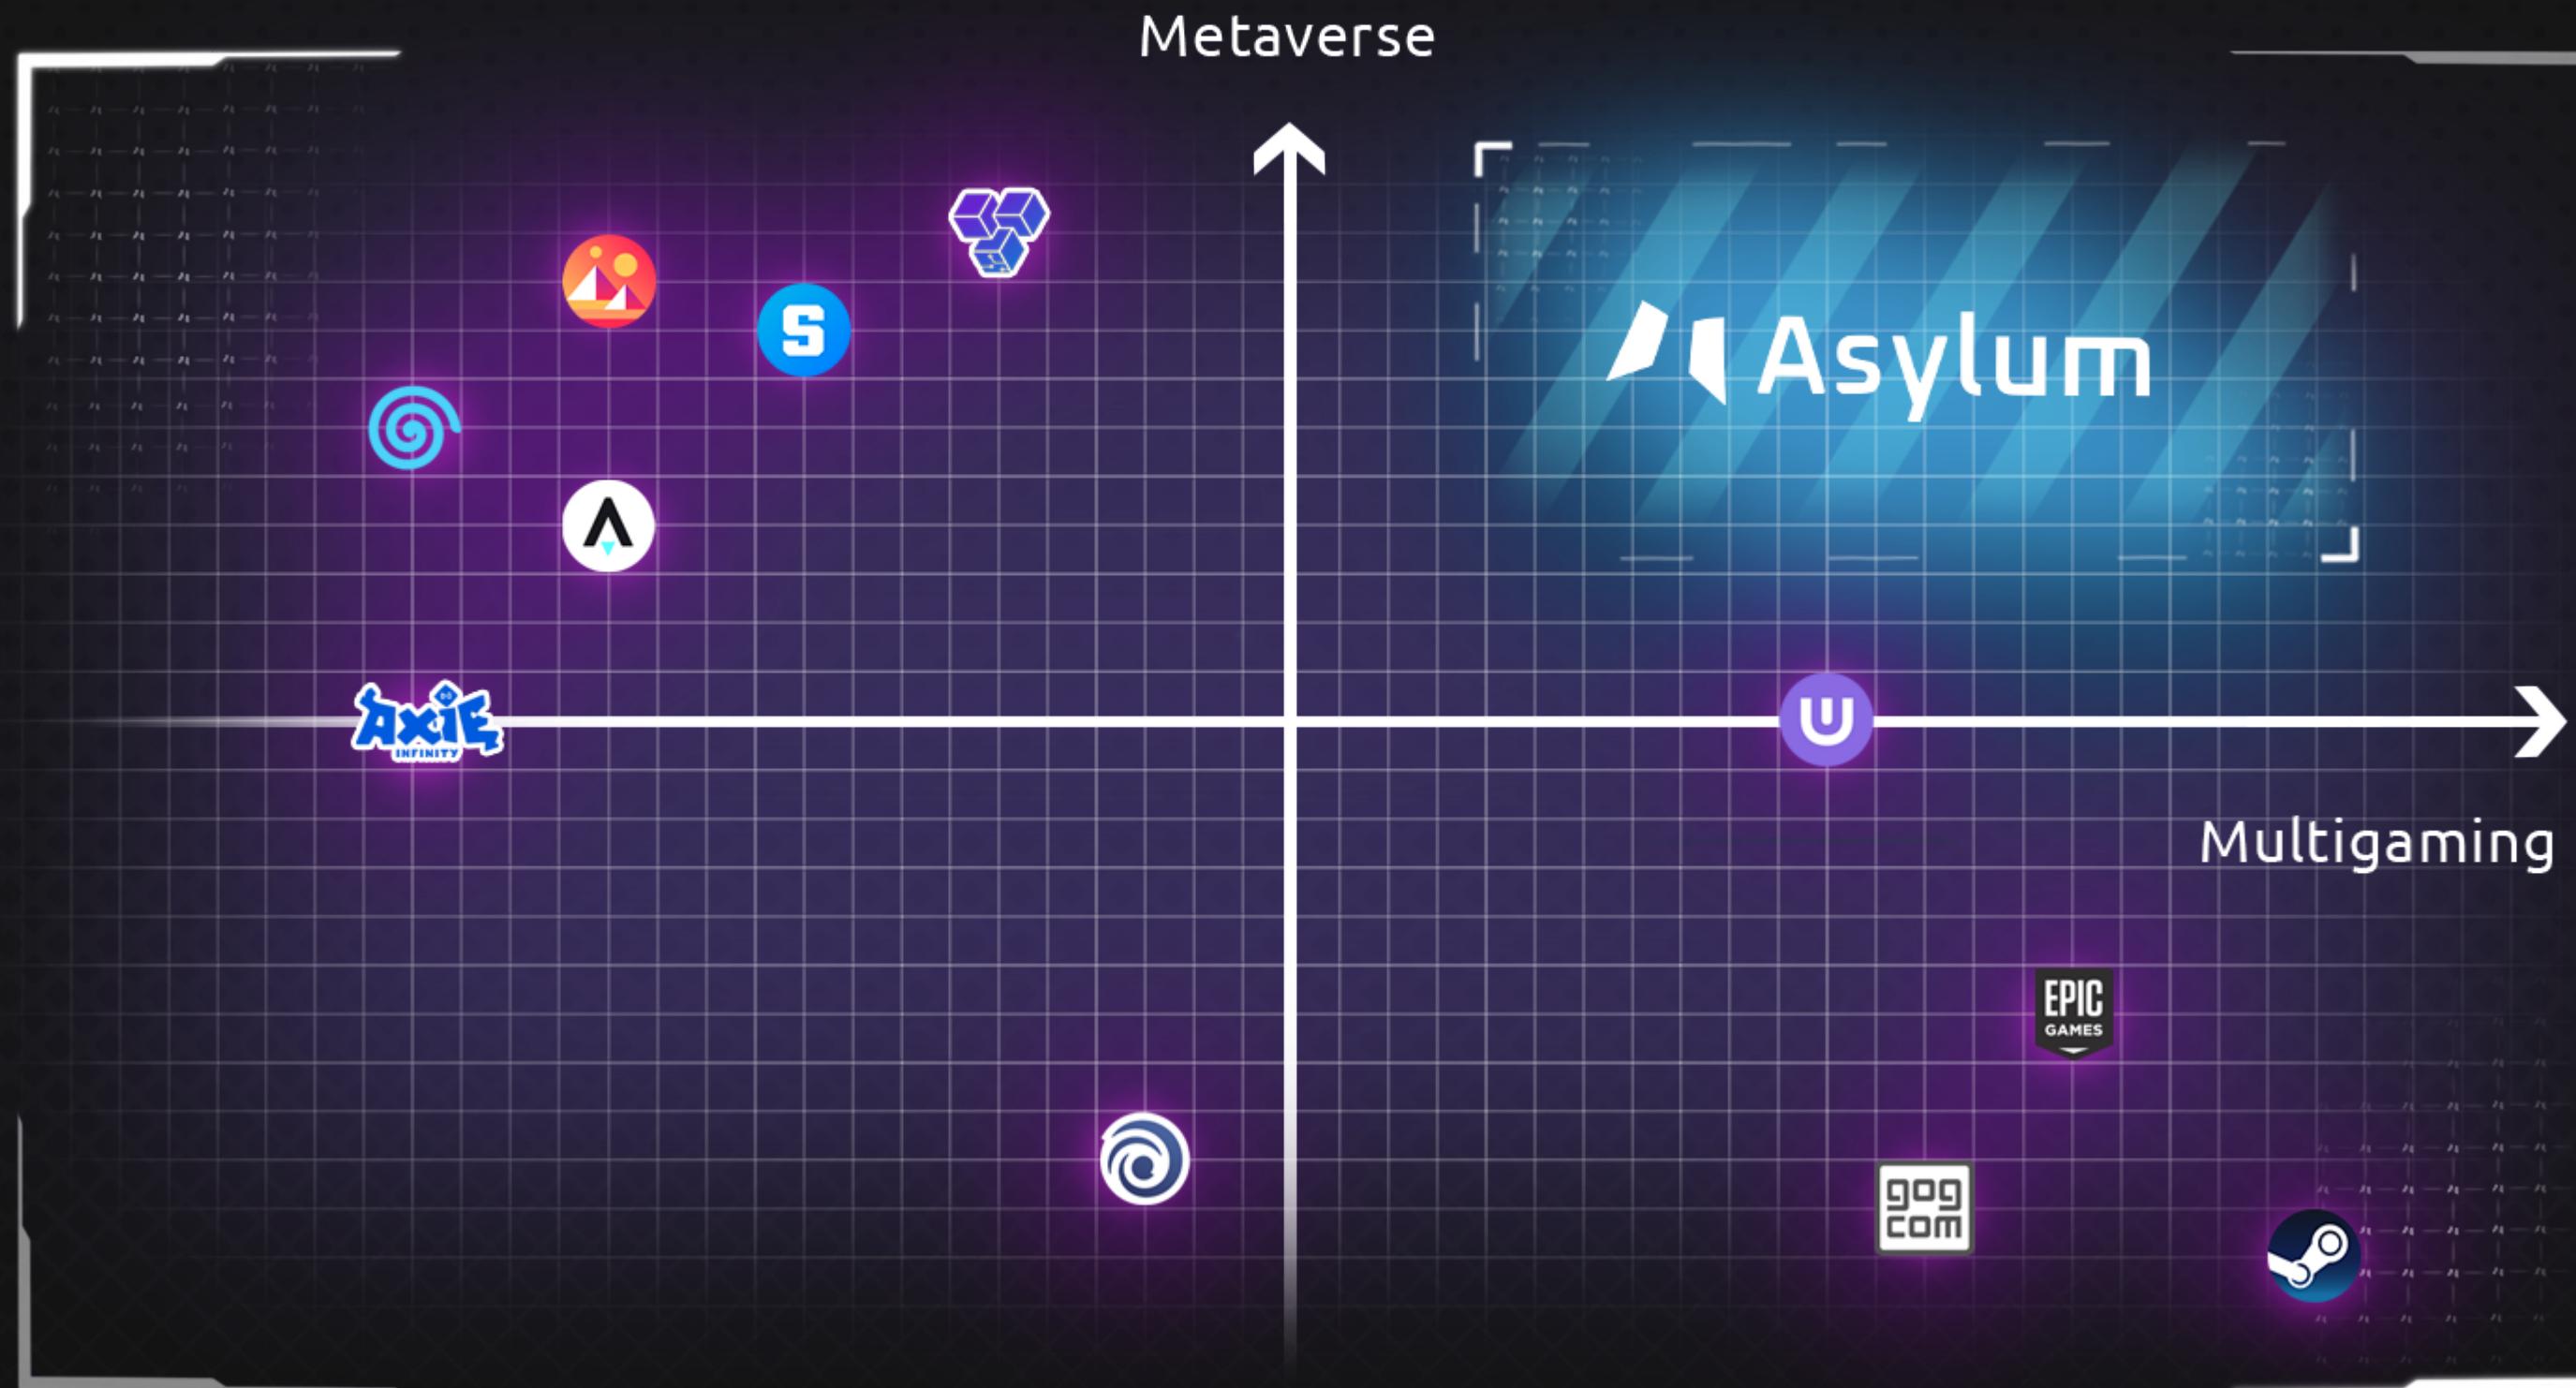

Games can be built in metaverse using convenient tools and reusable blocks

- Metaverse ecosystem**

Every game and gamer using the Asylum ecosystem joins the Metaverse, endless worlds limitlessly opened to the creation

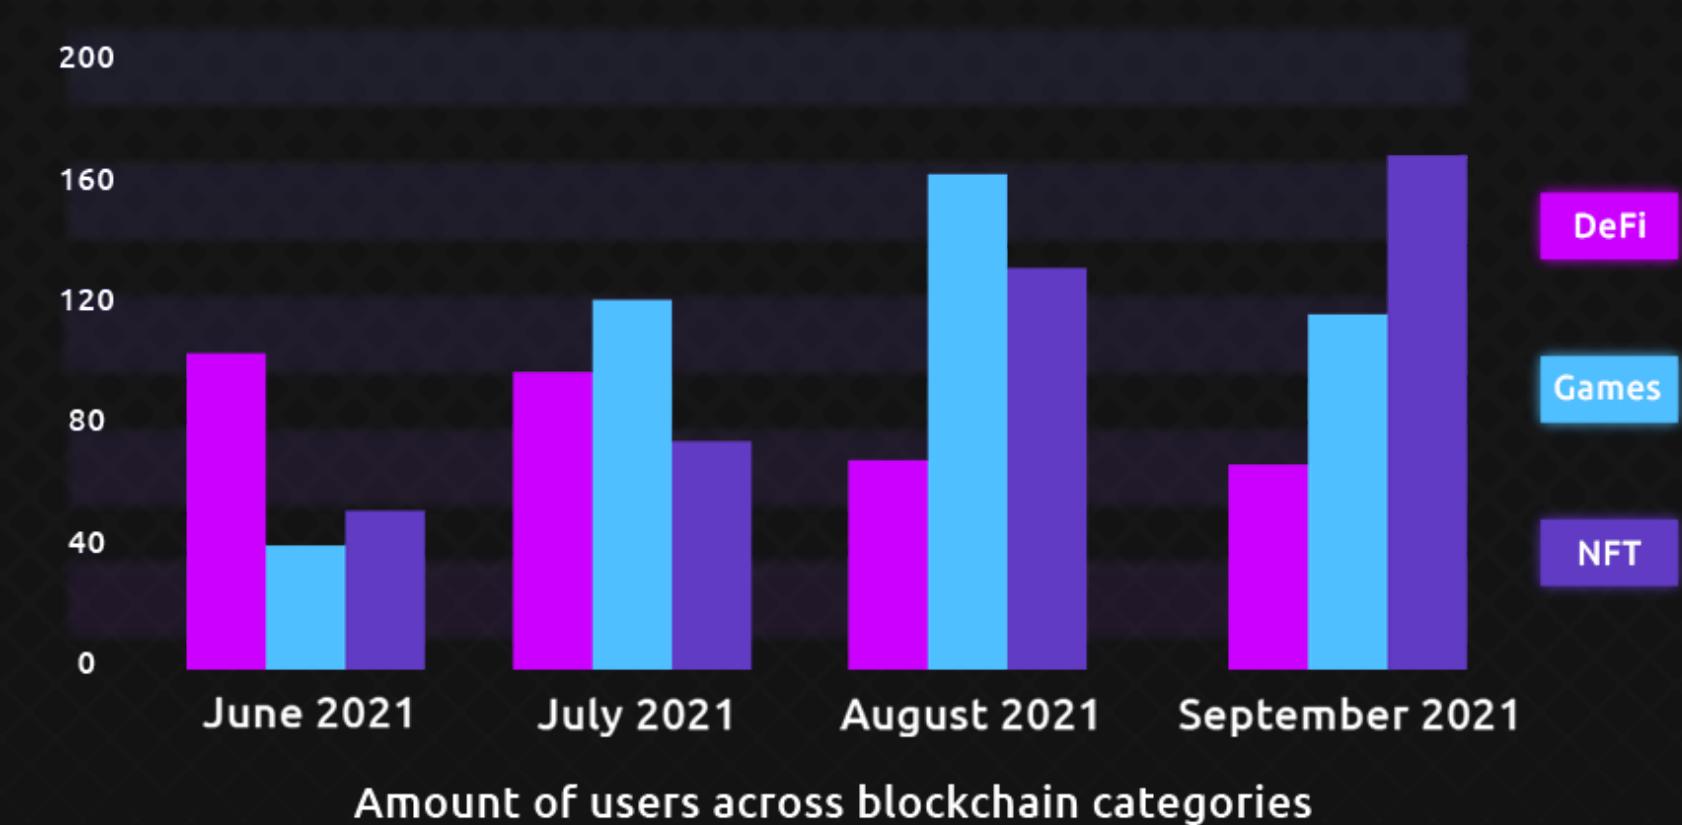

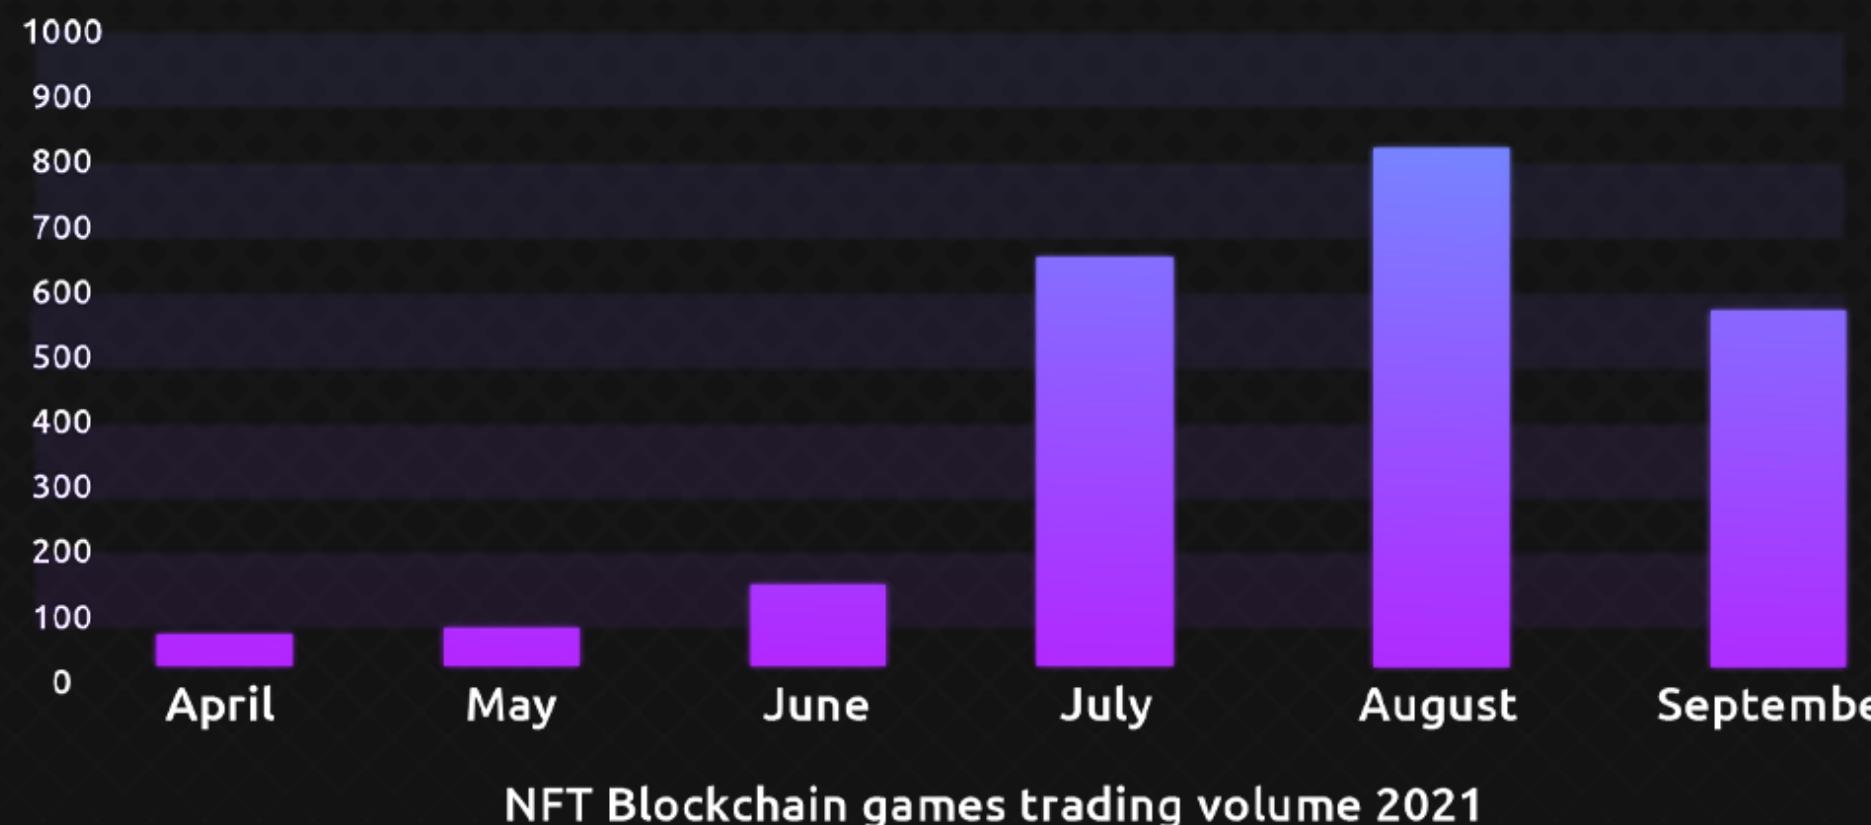

Market At Glance

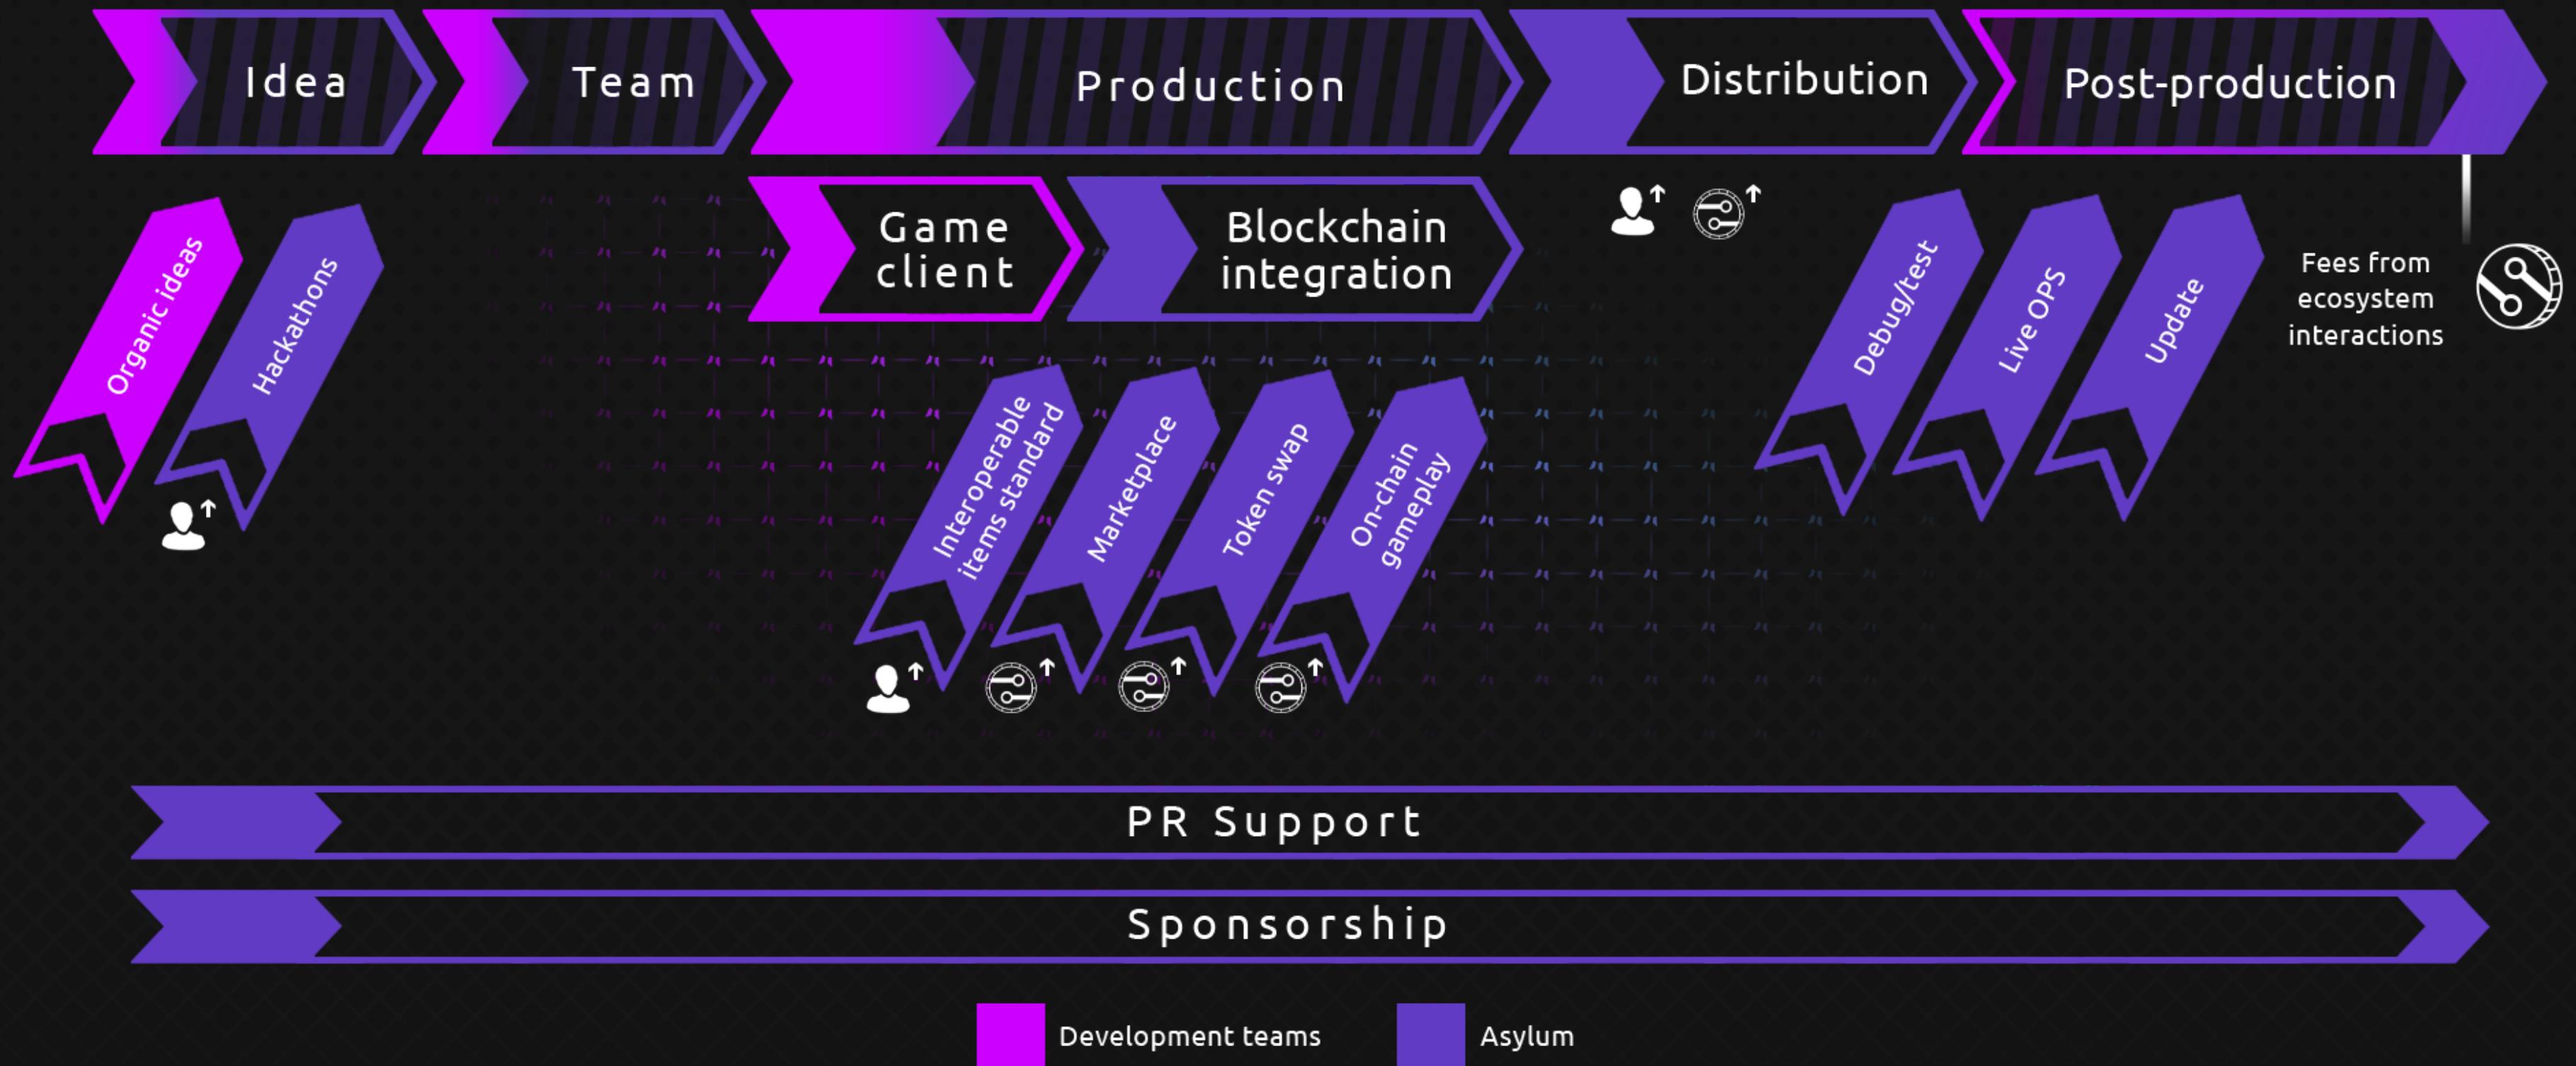

Initial Market Analysis

- Dynamic Interest shifts towards games compared to DeFi and NFT categories is moving in favor of gaming and NFT
- Major increase of games trading volume
- Strong tendency of involving new developers and gamers

Business Model

Token Utility

- Fees discount
- Governance (DAO)
- Interoperable currency:
 - One-click payment from any game token to any
 - Cross-game motivation

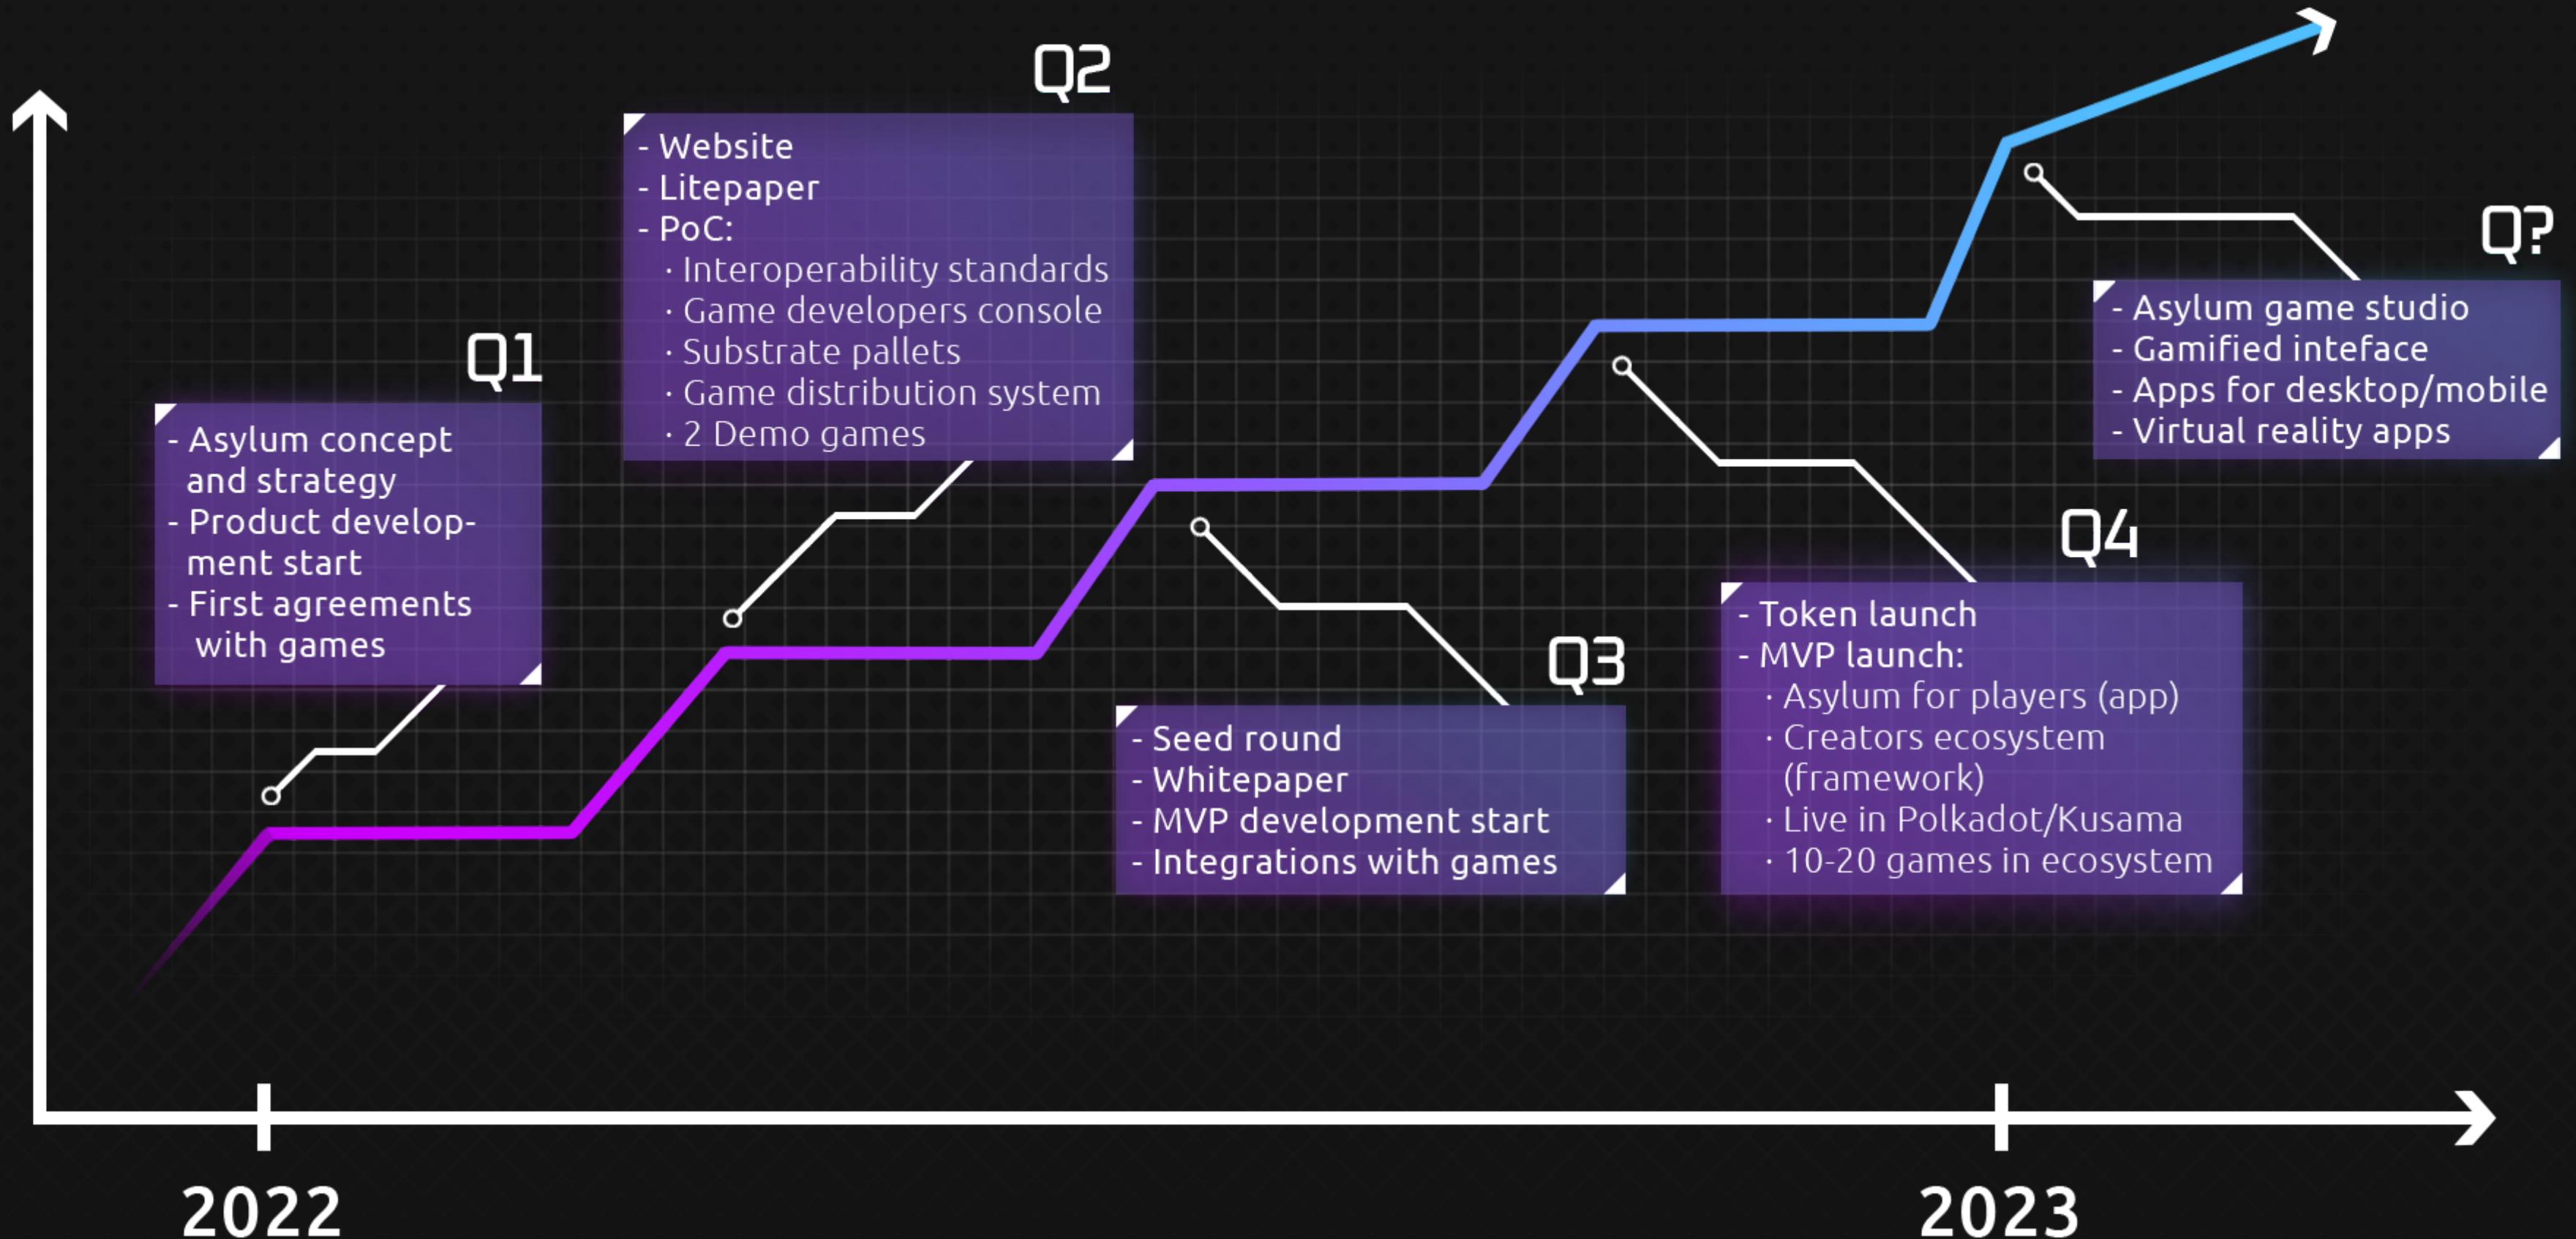

Tokenomics

Coming soon

Roadmap

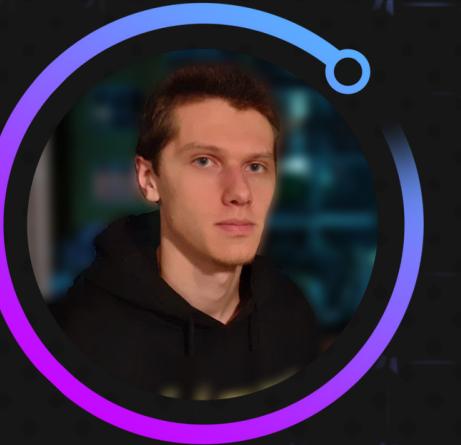

Team

Illia Abrosimov | Founder, CEO

Worked at Ubisoft, building a global microservices infrastructure to support all Ubi games. Particularly worked with R6, Far cry 6, YouTube drops. Led teams on game jams and hackathons.

[Linkedin](#)

Maria Yaremenko | Co-founder
